About Me

Product Manager | GenAI & Enterprise SaaS with 8+ years of experience architecting high-impact B2B SaaS and Enterprise digital products. Expert at bridging Product Management and Applied GenAI to transform complex business needs into scalable, revenue-generating products. Proven track record of taking products **from 0 to 1**, leading cross-functional teams across Tech, HR, E-commerce, and L&D domains through **Agile development cycles**, driving end-to-end digital transformation and aligning stakeholders. Proficient in **Integrations, cloud platforms, Requirement Management and wireframing**, with a strong focus on **KPI tracking and data-driven decision-making** to maximize product impact.

Experience

PRODUCT MANAGER / MANAGER BUSINESS ANALYST | COGNIZANT | JUL 2020 – PRESENT

AI Transformation

- Own GenAI initiatives (Virtual Interview Agent, Assessment builder, Forensic Tool, and Personal Assistant) and integration those core AI capabilities into Enterprise and Learning applications
- Optimised the AI-powered Personal Assistant via vector and vector-less **RAG pipelines and LLM fine-tuning**, reducing average resolution time by **25%**, average handle time by **55%** with improved Customer Effort Score.
- Developed a cross-platform AI-integrated **MLOps** forensic solution to validate documents, skills, and expenses, enhancing competency checks, background verification, and compliance processes while mitigating fraud risk.
- Launched a GenAI-powered virtual interviewer that facilitates **85% of Level 1 campus interviews** at Cognizant.
- Spearheaded the development of an AI-powered assessment platform, scaled and enabled to have **65% of evaluations** to be autonomously generated.
- Restructured requirement documentation process and integrated GenAI for development/test case creation, **increasing team velocity by 20%** without additional headcount.
- Designed and rolled out a recommendation engine that drove an **11% increase in avg consumption** for an enterprise platform serving **200K+ users**
- Delivered a cross-model analytics dashboard that monitors AI response latency, governs API switching and cost efficiency across production LLM deployments

Product Strategy

- Lead a team of 3 Product Owners to manage Learning & Development solutions portfolio, achieving additional **Revenue of ~\$550K** from **30+ client base**. Also manages **40+ team** member with **annual budget of ~\$400K**.
- Developed and scaled mentoring and Learning path application and later scaled into the enterprise LMS, reducing reliance on the third-party product and delivering annual cost savings of approximately **\$180K and \$290K** for cognizant.
- Created a Behaviour driven framework based engagement layer within the LMS that boosted learning content **completion rates by 22%**.
- Optimized onboarding product, achieving an average of **66% decrease in Hire to Deploy** cycle time across cognizant.
- Manages the full product development lifecycle (PDLC) from ideation and **BRD/User Story** creation to launch.
- **Achieved 70% feature adoption** rate within the first 2 month of a launch in mentorship module.
- Collaborates with cross-functional teams (Legal, Business, UI/UX, Tech and Compliance) to **setting KPIs, conduct demos, and prioritize features**.
- Created **PRDs & API** documents and also Conducted **50+hrs** of enterprise client interview and group discussion.
- Conducts **market research** and serves as **voice of the customer** in a fast-paced B2B environment to identify emerging trends, business needed and guided product direction while creating and prioritizing a **product backlog**.

SENIOR ENGINEER | MINDTREE | FEB 2016 – JUN 2018

- Skilled in testing, and implementing various modules on Oracle's SAAS HR product (HCM Fusion).
- Spearheaded the **migration** of critical data to a new platform while maintaining system stability and minimal user impact.
- Engineered a comprehensive **HR reporting** ecosystem to enhance data-driven decision-making for the client.

Education & Certifications

- **PGDM** in Marketing Strategy & MIS | IIM Rohtak
- **B.Tech** in Electronics & Communication Engineering | Jaypee Institute of Information Technology
- **Certifications:** Certified Scrum Product Owner (**CSPO**), Certified **SAFe** Product Owner/Product Manager

Skills

- **GenAI:** RAG, Fine-tuning, LLM, SLM, OpenAI, Gemini, LLaMA, Agentic AI, Orchestrators, MLOps, Prototyping.
- **Product Management:** Product Lifecycle Management, Market Research, Backlog Management, Product Adoption & Onboarding, Stakeholder Management, Enterprise and SaaS Product, GDPR, SOC2. Requirement Gathering/BRD, Resource Allocation, Product Roadmap Planning & Strategy, Business Insight and Solutioning
- **Technical & Tools:** Rest API, Integration, UI/UX, SQL & Reports, JIRA/ADO, Agile/Scrum & User Story, GCP/Azure.
- **Domain Expertise:** HR, Tech, EdTech, E-commerce (Catalogue Management).

Projects

MY learning studio / SkillSpring (LMS) | Aug/2020 – Present | In-house app + SaaS Application

- **Mentoring** – Platform supports connections and structured mentorship.
- **Learning Path** - Structured sequence of courses
- **Recommendation Engine** – Provides personalized recommendations based on user profiles.
- **Catalogue Creation & API Integration** – Enables content creation and management of third-party content.
- **Reels** – Replica of Instagram for short learning modules, engagement, and marketing.
- **Assessment Builder**- Adaptive AI assessment creation and evaluation platform

Proof AI | Aug/2025 – Present | In-house app

- **Custom Agents** - Custom & grouped agentic workflows with agent governance & evaluation for document validations
- **Workflow agnostic** – API based Plug-and-play validation across diverse enterprise processes.
- **Extensible Agent** - Pluggable third-party agent validation framework

Campus Recruit | Dec/2022 – Nov/2023 | In-house app

- **Hire to deploy Mapping** – Collate overall demand and facilitate resource alignment after training.
- **Campus Engagement** – Handle graduate queries and drive engagement.

AI Powered Interview Agent | Jun/2024 – Aug/2025 | In-house app

- **GenAI-Powered Virtual Interviewer** – Simulates in person interviews.
- **Integrated Speech-to-Text and Text-to-Speech APIs** – Enables seamless, voice-based interaction

Personalized Assistant | Nov/2023 – Jan/2025| In-house app + SaaS Application

- **Personal Support to Associates** – Manages timesheets, provides learning suggestions and resolves queries, etc
